

BONE CANCER TREATMENT CENTRES

Patients will go to their nearest Bone Cancer Centre to undergo diagnostic tests to confirm if they are suffering from a primary bone cancer. From this, patients will also visit the Bone Cancer Centre to receive their treatment.

There are specialist Bone Cancer Centres around the UK and Ireland that patients will be referred to, these are located in:

ENGLAND

There are five centres in England:

- **Birmingham:** The Royal Orthopaedic Hospital
- **Newcastle:** North of England Bone and Soft Tissue Tumour Service, Newcastle upon Tyne Hospitals NHS Foundation Trust
- **Oswestry:** The Robert Jones and Agnes Hunt Orthopaedic and District Hospital NHS Trust
- **Oxford:** Nuffield Orthopaedic Centre NHS Trust
- **Stanmore:** Royal National Orthopaedic Hospital

WALES

Patients in Wales travel to **Oswestry** or **Birmingham**.

SCOTLAND

There are three centres in Scotland:

- **Aberdeen**
- **Edinburgh**
- **Glasgow**

NORTHERN IRELAND

Patients are seen in **Belfast**

REPUBLIC OF IRELAND

Patients are referred to specialist hospitals in **Dublin** or **Cork** for further tests or treatment.

CHILDREN'S AND YOUNG ADULTS SPECIALIST CANCER TREATMENT CENTRES:

For children, teenagers and young adults, treatment such as chemotherapy and radiotherapy are usually given at a 'Children's and Young Adults Specialist Cancer Treatment Centre'.

For patients whose nearest specialist hospital is too far away, a 'shared care' arrangement with a closer hospital may be set up. This means that the multi-disciplinary team at a specialist hospital recommends a treatment plan and this is administered to treat the patient at a hospital closer to home.

CHILDREN AND YOUNG ADULTS SPECIALIST CANCER TREATMENT CENTRES ARE:

- The Royal Liverpool and Broadgreen University Hospitals NHS Trust
- Children's Hospital for Wales, Cardiff
